

American Protective Products (APP)

specializes in coordinating custom storage, shelving, and workstation solutions for premier laboratory facilities. Here's how we improved one client's laboratory facility to create a more efficient, effective processing environment.

Custom Storage & Shelving Solutions for Insa, a Premier Cannabis Facility

1

Full Needs Assessment

APP conducts a site visit to understand your one-of-a-kind pain points relating to storage and productivity. With Insa, we were able to identify unique opportunities to maximize storage while working around immobile machinery.

2

Materials & Application Evaluation

After confirming measurements, APP will explain each material option in detail as they pertain to your facility needs. We helped Insa find right-fit materials to avoid corrosion or bacteria build up to ensure long-lasting storage solutions and contaminant-free product.

3

Custom Metro Solutions

APP collaborates directly with Metro to create and coordinate mock-ups of your custom storage solutions. With Insa, we were able to add in additional stylized aspects: locking drawers, window vs. windowless bays, and more.

4

Quick, On-Site Delivery & Setup

Once we receive approval on mock-ups, APP works with Metro to place your order and select set-up options that work best for you. Metro offers white glove service with set-up and clean up, or you can decide to set up in house. Insa decided to have the Metro team set up the layout and the job was completed in 3-4 hours.

Insa's processing team needed to rework one of their lab facilities to achieve the following:

- Maximize Workstation Space
- Increase Storage Capacity
- Eliminate Risk of Corrosion

1 Starsys Double-Wide Mobile Workcenter with Cabinet Tops

2 Starsys Triple-Wide Mobile Workcenter with Cabinet Tops

- Flexible layouts and configurations to meet your storage needs
- Corrosion-proof polymer components for contamination-free product

- Microban antimicrobial protection inhibits the growth of stain- and odor-causing bacteria
- Ability to reconfigure individual carts to fit your facility
- Greater storage density in smaller footprint
- Easily reconfigure your storage layout as your facility needs change

American Protective Products has proudly provided the highest quality storage equipment, safety apparel, and PPE for over 40 years.

We deliver industry-leading products backed by unparalleled customer support for healthcare, laboratory, research, and other facilities where safety and security are the highest priority.
